Profile

I am a web developer and student who makes fast, accessible, great-looking web sites and web apps.

I love working with Javascript, HTML, CSS, and frameworks like Svelte to make projects that help people get things done, but my understanding of the fundamentals of the web platform and my technical skills, coupled with my years of experience in fast-paced and detail-oriented newsrooms gives me a unique perspective into the needs of users and helps make me a perfect fit for any team.

Work History

Digital Executive Producer — August, 2021 - Present

- Leads the digital content team to produce local news and deliver stories across platforms.
- Creates and executes content strategy to improve engagement and audience metrics on the core website and social media.
- Contributes custom HTML, CSS, and JavaScript in stories where appropriate.

Digital Content Producer — July 2019 - August, 2021

- Built and maintained custom streaming control and broadcast graphics playout software using Svelte, JavaScript, and WebSockets.
- Built a custom prompter for use in a digital-only live streaming studio.
- Oversaw the creation, technical execution, and production of live streaming and video content.

Multimedia Journalist — February 2019 - July, 2019

- Researched and developed engaging local stories for broadcast news.
- Produced, reported, shot, wrote, and edited video content.
